### DETAILED ACTION

1. This office action is in response to communication filed on 04/15/2008.
2. Claims 1-43 have been cancelled. Claims 44-150 are presented for examination.

#### **Allowable Subject Matter**

3. Claims 44-150 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 44 and 97, the prior art of record, both Milic-Frayling et al. (US 6,968,332) and Soulanille et al. (US 7,110,993) teach a method and system for implementing an information distribution campaign to end users of a data network, the data network including at least one server system associated with a campaign provider, and including at least one client system associated with an end user, the method comprising: selecting keywords relating a first information distribution campaign; generating campaign information files which include the selected keywords; transmitting the campaign information files to the client system; selecting, at the client system, using the campaign information, specific context of a first document to be marked up, wherein at least a portion of the first document is displayed on the client system; and performing, at the client computer system, markup operations on at least a portion of said selected specific context . Milic-Frayling and Soulanille do not teach performing markup operations on a first portion of specific original content to thereby convert the first portion of specific original content into a first link to a first URL, the first link including a first portion of marked up content; displaying the first link at the client system, wherein the display of the first link includes display of the first portion of marked up content;

detecting an occurrence of a first event associated with a location of a cursor at the client system being positioned over a portion of the displayed first link; and automatically displaying, in response to detection of the first event, a first overlay advertising impression at the client system, the first overlay advertising impression including advertising information comprising a second portion of displayed content which is different from the first portion of displayed marked up content. These uniquely distinct features render the claims allowable.

Regarding claim 150, the prior art of record, both Milic-Frayling et al. (US 6,968,332) and Soulanille et al. (US 7,110,993) teach a system for implementing an information distribution campaign to end users of a data network, the data network including at least one server system associated with a campaign provider, and including at least one client system associated with an end user, the system comprising: means for selecting keywords relating a first information distribution campaign; means for generating campaign information files which include the selected keywords; means for transmitting the campaign information files to the client system; means for selecting, at the client system, using the campaign information, specific context of a first document to be marked up, wherein at least a portion of the first document is displayed on the client system; and means for performing, at the client computer system, markup operations on at least a portion of said selected specific context . Milic-Frayling and Soulanille do not teach means for performing markup operations on a first portion of specific original content to thereby convert the first portion of specific original content into a first link to a first URL, the first link including a first portion of marked up content; means for

displaying the first link at the client system, wherein the display of the first link includes display of the first portion of marked up content; means for detecting an occurrence of a first event associated with a location of a cursor at the client system being positioned over a portion of the displayed first link; and means for automatically displaying, in response to detection of the first event, a first overlay advertising impression at the client system, the first overlay advertising impression including advertising information comprising a second portion of displayed content which is different from the first portion of displayed marked up content; wherein the specific original content includes at least one original link including a first original link to a specific URL, the first original link having associated therewith a first set of original display format characteristics for use in causing a displayed appearance of the first original link to be in accordance with a first display format; wherein the first link has associated therewith a second set of original display format characteristics for use in causing a displayed appearance of the first link to be in accordance with a second display format different from the first display format.

These uniquely distinct features render the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Namrata (Pinky) Boveja whose telephone number is 571-272-8105. The examiner can normally be reached on Mon-Fri, 9:00 am to 5:30 pm.
